

Additional BABE™ Options

BABE LINK™

Want to increase the speed of your ultrasound reporting? BABELink™ is a software and hardware package that allows direct, electronic download of patient and fetal information from the ultrasound scanner.

BABELink™ is limited to specific ultrasound machines and cable assembly. Please contact us for more information on BABELink™.

No need to leave your workspace or print out a report just to send a fax!

BABEFax™ allows you to fax reports directly from BABE™. This option also provides automatic fax number lookup based on the referring physician, and an automatic log of all BABE™ faxes.

BABE FAX™

BABE MAIL™

No need to leave your workspace just to send an email, and no need to copy or retype information or look up email addresses. BABEMail™ allows you to email reports directly from BABE™. Benefits of using this software over traditional email methods include: Automatic email address lookup based on the referring physician and automatic log of all BABE™ emails.

Want more antenatal testing? BABEAnte™ offers two additional tests for utilizing ultrasound reporting: a Non-Stress test and Umbilical Artery Doppler test.

BABE ANTE™

BABE STAT™

Want to see annual productivity statistics for sonographers, interpreting physicians, and referring physicians?

BABEStat™ allows you to run productivity statistics directly from BABE™. This is a great way to show you meet/exceed credentialing requirements.

You can graph productivity for your entire practice, or limit it to a single site. Personal productivity can be displayed individually, or shown relative to all other sonographers/physicians.
